Why Standardize?

Global organizations are facing daunting challenges to reduce cost and increase productivity. Clients around the globe utilize the Goldtouch Adjustable Keyboard as a core component of their Risk Management Programs. The Goldtouch is consistently among the top alternative keyboards selected by corporations, and is the preferred keyboard among Certified Professional Ergonomists, Occupational Therapists and Physical Therapists who recognize the ability of the Goldtouch to “fit” a wide range of body types and anthropometries.

While the success of the Goldtouch is well-established, we have found that companies that take a more proactive approach and design their programs to “work ahead of the injury,” experienced fewer number of claims, lower average claims costs, and increases in productivity as high as 17% .

One client saw their average claims cost decrease from nearly \$100k per claim down to \$40k in

just three years! Since then, the average claims experience is less than \$10k, and the company happily reports that incidence rates continue to fall.

Call us today to learn more about how the Goldtouch solution can be widely delivered to your employees, and what the cost savings from reduced claims and increased productivity could mean for you and your organization.

Goldtouch Standard

ADJUSTABLE KEYBOARD

A proven design and years of longevity make the Goldtouch a favorite for professional Ergonomists, Physical Therapists and Occupational Therapists. Designed to fit the range of body types, the Goldtouch will properly straighten the wrists and arms, aligning with the shoulders to achieve a neutral typing posture. No Assembly Required!

FEATURES AND BENEFITS

- Adjustability: 0°-30° adjustment for ulnar deviation (wrist splay) in the horizontal plan, combined with 0°-30° adjustment for wrist pronation (vertical tenting)
- Soft key touch, low activation force and full key travel distance provides keying comfort and reduces risk from “bottoming out” when keying.
- Compact size allows for use in limited space environments, and reduces shoulder abduction when reaching for mice and other peripherals.
- Ease of use and intuitive design allow new users to adjust the keyboard to a comfortable typing position without additional accessories or attachments.

- Adjustability: 0°-30° adjustment for ulnar deviation (wrist splay) in the horizontal plan, combined with 0°-30° adjustment for wrist pronation (vertical tenting)
- Removable Protective Covers: Allows the keyboard to be placed on a notebook.
- Soft key touch, low activation force and full key travel distance provides keying comfort and reduces risk from "bottoming out" when keying.
- Compact size allows for use in limited space environments, and reduces shoulder abduction when reaching for mice and other peripherals.
- Ease of use and intuitive design allow new users to adjust the keyboard to a comfortable typing position without additional accessories or attachments.
- Dimensions: W 13.25" x D 5" x H 1"

ErgoSecure 2.0

SMARTCARD KEYBOARD

The only approved ergonomic keyboard that meets the FIPS-201 federal mandate for HSPD-12 compliance, the ErgoSecure 2.0 allows Federal agencies and Prime contractors to address not only the physical/logical access requirements (via the integrated smart card reader), but also the needs of a physically diverse and, in some cases, symptomatic workforce.

FEATURES AND BENEFITS

- Addresses the Federal Section 504/508 needs of the physically impaired and repetitive motion injured
- Reduces and eliminates awkward and uncomfortable typing postures – often a precursor to repetitive motion injuries, Workers' Comp claims and Lost Work Days
- Eliminates the cost of stand-alone card readers and their required IT support
- Increases desktop space by eliminating stand-alone readers
- Increases Smart Card "front & center" visibility, thus decreasing the incidence of accidental "card leave-behind" from out-of-the-way card reader placement

*Not Check Point Tested, but meets all International Carry-On Standards.

Numeric Keypad

FEATURES AND BENEFITS

- USB Connector
- 22 Keys
- 2 USB Hubs (for low power devices; mice, USB memory sticks)
- Easy access to essential keys such as:
 - Tab, Escape, Backspace
 - and also frequently needed symbols : , () % \$ Y L E c \
 - calculator functions such as: MS M+ MC MR will make the use of MS calculator much easier as will the Clear (Esc) CE (Del) Backspace +/- 00 and = keys

With included USB hubs, the Goldtouch Numeric Keypad allows the convenience of remaining detached from the keyboard for optimal mouse and keypad placement. With a crisp tactile feel, proper audible feedback, hardcore number crunchers will enjoy the ease of having a numeric keypad at their workstation or attached to their notebooks.

Goldtouch Comfort Mouse

Ergonomic design supports the hand in a naturally sloping angle that places the wrist in a neutral position. Supports a more neutral wrist angle of 24 degrees sloping downward to the right. Alleviates muscle fatigue and discomfort caused by pronation of the wrist.

Users are less likely to acquire an RSI caused by the repetitive motion of every day mousing. As a therapeutic measure, this mouse greatly reduces wrist pronation.

KOV-GTM-B Right-handed Bluetooth
KOV-GTM-L Left-handed USB

Palm Supports

Not to be used as wrist rests, which place undue pressure on the nerves and tendons in the Carpal Tunnel Sheath, Goldtouch Palm Supports provide a safe respite for the hands when not typing.

Goldtouch Part Nos.

GT7-0017 Black Palm Supports (2)

GT7-0003 Blue Palm Supports (2)

Mousing Platform

The unique design of the Goldtouch Mousing Platform allows users to mouse in greater comfort with less risk of contact stress on the nerves in the lower hand and wrist. The gentle slope and curvature of the Mousing Platform help achieve more neutral postures and keep the mouse on a similar plane to the keyboard.

GT6-0017 Black Mousing Platform

GT6-0003 Blue Mousing Platform

Evluent

VERTICAL MOUSE

As the third generation of the Vertical Mouse, the Vertical Mouse 3 offers a significant design improvement over its predecessors by creating a small groove for the pinky to rest comfortably. By allowing the user to maintain a more natural “handshake” grip, the hand and wrist are turned on the side, effectively eliminating most risk factors found in traditional standard mice. To reduce contact by the side of the hand on the ulnar nerve, we recommend pairing the Vertical Mouse 3 with the Goldtouch Mousing Platform.

Also available in Wireless!
